### **DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,3,4,5,6,10,11,12, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Doering (USPN 5202403). Doering teaches the claimed inventions as evidenced at col 1, Ins 5-12; col 2, Ins 48-65; col 3, Ins 12-27; col 3, In 40-col 4, In 20; col 5, Ins 3-63; col 7, Ins 20-35; col 10, Ins 8-20; and col 13, Ins 33-55.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doering (USPN 5202403). The above teachings of Doering are incorporated hereinafter. In regard to claims 7 and 8, such materials are well-known among the phenolic compounds. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed compounds in the reaction in order to produce diverse phenol resins having desired characteristics.

Art Unit: 1791

5. Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doering (USPN 5202403). The above teachings of Doering are incorporated hereinafter. In regard to claims 13-15, the use of a specific material in the claimed process is a mere obvious matter of choice dependent on the desired final product and of little patentable consequence to the claimed process since it is not a manipulative feature or step of the claimed process. Further, the claimed materials are well-known in the molding art and impregnation art. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed material in the process of Doering in order to mold diverse impregnated products. In regard to claims 16-17, the use of a specific apparatus in the claimed process is a mere obvious matter of choice dependent on equipment availability and of little patentable consequence to the claimed process since it is not a manipulative feature or step of the claimed process. Further, the claimed apparatus are well-known in the molding art and impregnation art. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed apparatus in the process of Doering in order to reduce molding costs and time.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following US patents teach the state of the art:  
5202189, 4116921, 4403066.
